## **Steel Bridges**

Bridge Construction is one of the most completed divisions of APM, the sector where we feel the leader. Advanced technology, experienced staff and completed projects demonstrated that.

# Steel Bridges

For several years we have managed successfully to compete with dignity, win and fulfill important projects at home and abroad.

Thanks to the available infrastructure, and a staff of over 200 employees, more than 40 professional welders, we have a production efficiency of approximately **1000Ton/month.**

What makes APM so unique is that it covers projects from design to the final assembly process. Girders sections vary according to the project, but our capacity covers a production range with beams up to 4m high and 18m long. Simultaneously, internally or in cooperation with our partners, we also cover the field installation process.

**Whether if it is highway, rural or pedestrian bridge we take care to enhance the landscape both aesthetically and environmentally. Our skilled fabricators and welders handcraft each bridge to deliver a design that stands the test of time.**

Quality is a strong and very important point in our work, so APM' goal is to invest heavily in the product quality. The certifications, including from the qualification and training of the employees to certification of processes and products.

## Standards we work with:

ISO 9606-1

ISO 9001: 2015

ISO 14001: 2015

ISO 45001: 2018

ISO 3834-2: 2006

EN 1090-1: 2009 + A1: 2011 Class EXC3

The geographical location allows us quick access to national highways and ports of Vlora and Durres from where we can reach any destination anywhere in the world.
