## ***Energy***

Rising demand for electricity and renewable energy has made steel profiles a key element for the sector. Its environmental capabilities, strength, durability, cost-effectiveness, easy maintenance and set up make steel the most useful element mainly in Wind Towers, Solar Energy, Hydropower, Waste Processing Plants etc.

# Energy

APM is the leading supplier of fabricated structural steel in Albania and beyond including a large number of wind towers, waste processing plants, supply of fabricated structural steel of hydropower plants and photovoltaic parking from fabrication in the workshop to transportation and field installation process.

Thanks to the available infrastructure, and a staff of over 200 employees, more than 40 professional welders, we have a production efficiency of approximately 1000Ton/month.

Quality is a very important part of our work. Our aim is to provide our services and products with high quality. Our experienced QC Team is on the ground to follow continuously each phase of the work doing dimensional checks, visual control and other non-destructive testing methods on welds and raw materials.

APM Engineering always performs the projects with certified welders generally according to EN 9606. Automatic, semi-automatic and manual welding methods are available in our facilities.

#### Standards we work with:

ISO 9606-1

ISO 9001: 2015

ISO 14001: 2015

ISO 45001: 2018

ISO 3834-2: 2006

EN 1090-1: 2009 + A1: 2011 Class EXC3

A high priority is given to the Logistics Department. Our staff will systematically follow the fulfillment of your requirements, organizing the export packaging and shipment directly to your worksite in safe, respecting the set deadline.
