Mechanical Parts

From prototype to production! Heavy investment in infrastructure and technology, updating and sophistication of equipment and tools allows APM to meet the requirements and demands of its internal and international clients.

Mechanical Parts

Our team of procurement, sourcing, engineering, and manufacturing experts have experience in creating products for a wide variety of industries.

Thanks to the available infrastructure, and a staff of over 200 employees, more than 40 professional welders, we have a production efficiency of approximately 1000Ton/month.

Our staff is on the ground to follow continuously each phase of the Supply Chain Management operation. APM employs engineers who direct machining processes and inspect tooling and equipment to ensure that we are meeting all demands and requirements.

Quality is the most important part of our work. Our quality management system is under continuous improvement to satisfy our client's requirements. A qualified staff is the backbone of the company. APM invests in human qualifications, including employee training and certification of processes and products.

Standards we work with:

ISO 9606-1

ISO 9001: 2015

ISO 14001: 2015

ISO 45001: 2018

ISO 3834-2: 2006

EN 1090-1: 2009 + A1: 2011 Class EXC3

A high priority is given to the Logistics Department. Our staff will systematically follow the fulfillment of your requirements and their transportation to the right destination, respecting the set deadline.
