## Oil&Gas

The oil and gas industry was the purpose of establishing the company, the history begins in 1995, when Albstar, a civil construction company was founded. Steel fabrication was an important department of Albstar. Due to the growing demands in the steel fabrication sector and Oil & Gas industry, on 2011, was decided to create a new company branded as “APM” with the only focus on steel fabrication. Extensive experience, cooperation with famous international Oil & Gas companies and successfully completion of the projects make APM a leader in the Oil and Gas Division.

# Oil&Gas

For many years we won the trust and confidence of our customers. Accuracy, Quality and Human Resources is the strongest point of APM.

## Pipeline

APM cover pipeline projects with different diameters and various type of metal such as Stainless Steel or Carbon Steel from prefabrication in the workshop to the field installation process but not limited to the Joint Hardness Process, Blasting, Painting and Coating.

## Tanks & Vessels

APM includes an extensive line for the production of crude oil tanks, fire water tanks, vessels and pressure vessels. APM is the main supplier of Oil extraction companies in the country, undertaking the construction of oil tanks of various sizes from the workshop to their field installation process.

## Varieties of facilities in the Oil & Gas industry

APM has the capacity to provide the production of various facilities according to the required shape and geometry including the highest quality standards.

Quality is a strong and very important point in our work, so APM' goal is to invest heavily in the product quality. The certifications, including from the qualification and training of the employees to certification of processes and products.
